

COMPREHENSIVE ERP APPLICATIONS

Because we understand your business,
we craft software that's 100% tailored
to fit your operations.

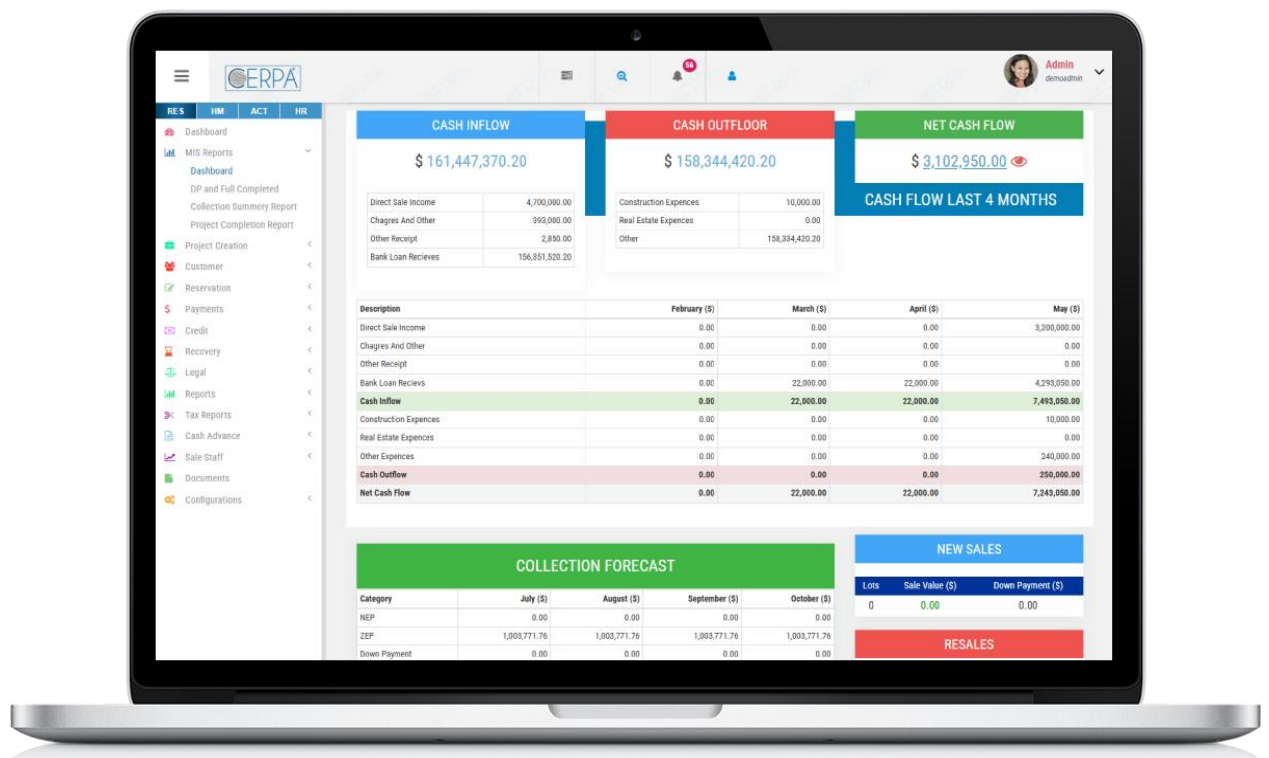

What is CERPA®?

CERPA® was developed in 2017 by Codesense® with a vision to simplify and empower business operations through intelligent software. Over the past half-decade, CERPA® has grown to serve more than 3,000 users across dozens of organizations, becoming a trusted solution in industries ranging from construction to manufacturing.

Our journey has been shaped by close collaboration with leading industry players. Their real-world challenges and insights have helped us build a platform that is not only powerful but also practical and user-friendly. At the heart of our success is a dedicated team with deep industry domain knowledge-this is what truly sets CERPA® apart.

We take pride in our reliability. With zero downtime since inception, CERPA® has consistently delivered a seamless experience to every user. Our commitment to excellence means every update is delivered on time, as promised. This unwavering reliability and performance have earned us something rare in the software world: a churn rate of zero.

CERPA® isn't just a product-it's a proven partner in business success. That's why it continues to be the number one choice for organizations looking for clarity, control, and confidence in their operations.

Why CERPA®?

CERPA® is the best ERP system in the market designed to be fully customisable to support 100% of your business operations. Whether your processes are simple or highly specialised, CERPA® adapts seamlessly to meet your exact needs without forcing you into rigid templates. Built for businesses in production, construction, real estate, rental property, and microfinance, CERPA® ensures every resource is managed with maximum efficiency. From planning to execution, it empowers you to stay ahead with precision and control across every department.

Beyond technology, CERPA®'s developers bring real-world expertise in production, construction, real estate, rental property, and microfinance. This deep industry knowledge allows us to design and improve features that directly match your day-to-day operational realities.

About Codesense®

Founded in 2012, Codesense® began as a dedicated software development company with a strong focus on building customized, cloud-based ERP solutions for clients in Sri Lanka and internationally. In 2024, we expanded our footprint into the Pacific region by launching operations in New Zealand under the entity Zeylan Limited.

Our team comprises highly skilled and experienced software engineers who possess deep knowledge of both local and global industry landscapes. They bring expertise in the latest ICT tools, methodologies, and technologies to every project.

At Codesense®, we understand that no two businesses are the same. That's why we provide bespoke ERP solutions tailored to meet the distinct operational needs of each client-delivering greater efficiency, adaptability, and long-term value.

Vision

We envisage ourselves as a trail-blazing organization that will establish a new paradigm in software solutions and in the arenas of multimedia & web development.

Mission

To offer unparalleled solutions to our clients based on innovative concepts and designs, which will give them a unique edge over their competitors.

Features of CERPA®

CERPA® is built with flexibility at its core, allowing businesses in construction, production, real estate, rental property, and microfinance to operate without compromise. Unlike many rigid ERP systems that force companies to adapt their workflows, CERPA® adapts to you-customizing every module to fit your exact needs, no matter how unique or complex your processes are.
